

INDIVIDUAL FOOTWEAR | SPRING/SUMMER 2016

KLAVENESS

Dear customer,

This season, there are so many news we want to share that we are presenting them to you in this dedicated leaflet.

It starts with the new women styles and a brand new voluminous men last - Jo, a foot-shaped last that your male customers will enjoy. You can also get to know the CM (Custom Made) Sandal concept, a new possibility for those working with the Klaveness foot scanner.

We hope you will be as excited as we are with the growing possibilities and smart solutions our custom-made product categories offer!

As usual, we are happy and thankful for any feedback you may provide.

CUSTOM MADE SANDAL CONCEPT

This brand new product category allows you ordering a custom made sandal based on a foot scan.

Alternatively, you simply refer to an order of foot orthotics previously delivered to your patient.

You can choose from two women and two men styles.

As usual, we have several adjustments and customizations available that you can use to adapt the sandal to the particular needs of your patient.

To make sure that the fit is perfect we will only accept a 3D scan combined with a foot picture from our Klaveness foot scanner.

This is to ensure that both the fit and outline gets right.

For more information we can provide a detailed manual.

RUBBER TRACK WITH GOOD GRIP
 EVA MIDSOLE FOR OPTIMAL CUSHION AND COMFORT
 INDIVIDUAL 3D SCANNED FOOTBED
 SOFT LEATHER COVER AND LINING
 ADJUSTABLE STRAPS
 LEATHER UPPERS

NEW SOLE TECHNOLOGY

Klaveness takes another step that closes the gap between standard and custom-made shoes.

We are the only company in the market offering machinery made soles for individually produced orders.

These soles have significant advantages over the traditionally handmade EVA soles:

- Milled EVA soles offers extra depth that hides more of the volume than a traditionally made EVA sole.
- No separate welt is needed as it is machined from the same material as the mid sole. This provides a sole with less glued layers making it softer and more appealing.
- The weight of the sole is reduced.
- We can adapt them to any last shape. Even with two different shaped lasts on left and right foot we can make a similar design for both feet.

NEW ROCKER SOLE SPECIFICATION

We now offer five different basic shapes of rocker soles for our customers to choose from. Our aim is to make sure that customers get the functionality they need on their new pair of shoes.

We are pleased to present these options in our recently updated OAS and OIL order forms. Now, the process of ordering the correct rocker sole will be much easier. It is possible to choose from the following five options:

- Late rocker
- Normal rocker
- Early rocker
- Stage rocker
- Polyphasic rocker

The Normal rocker will be used as default for rocker soles orders in the FIA product category. The remaining options will only be available as OAS and OIL.

SOLE		LEFT	RIGHT
Sole #	Heel height		
ROCKER SOLE		Internal <input type="radio"/>	External <input type="radio"/>
AL 5991	Rocker rigid	<input type="radio"/>	<input type="radio"/>
AL 5993	Rocker flexible	<input type="radio"/>	<input type="radio"/>
	Late rocker	<input type="radio"/>	<input type="radio"/>
	Normal rocker	<input type="radio"/>	<input type="radio"/>
	Early rocker	<input type="radio"/>	<input type="radio"/>
	Stage rocker	<input type="radio"/>	<input type="radio"/>
	External Polyphasic rocker	<input type="radio"/>	<input type="radio"/>

CUSTOM ORTHOTICS

We are proud to present a new foot orthotics product. This is a new type of foot orthotic that is thinner than a traditional EVA foot orthotic. It will fit in to shoes where a normal EVA orthotic takes too much of the space. But they still offer great functionality and support to the feet.

Positives available from 3D files.

If you need positives for making orthotics yourself, we can now provide this product. Simply write "Positive" in "message to producer".

If you want to make Therox orthotics or shape thermoplastic pre made orthotics we can deliver a milled positive for you. This gives you the possibility to work in the same way as you do with a classic plaster positive. In most cases, our customers order 3D foot orthotics but in some cases a different kind of material is needed. Then you can send the same 3D file and have it made as a positive. We produce them in a hard EVA material.

CUSTOM MADE LASTS

All lasts are now made using the highest quality wood available on the market. The only exception is PU lasts made from high plasters and for special reasons in a few cases.

Now we have dedicated last order forms for lasts. This makes ordering lasts easier than ever before. We have two types of last ordering forms. Modular lasts and Made to measure lasts.

The *Modular* last concept is great to use when you have the Klaveness fitting stock or Klaveness Medical Stock shoes (MSS) at hand. *Modular* lasts takes the FIA and OAS lasts concept one step further. You can both add and remove volume and make changes in heel height, toe spring and much more. *Modular* lasts start with a Klaveness standard last in 3D. You describe the changes you want to make using the order form. After this, we will make all the changes on the 3D last and finally mill the last in wood. *Modular* lasts include the thickness of the foot orthotics in the last volume.

In case using *Modular* lasts is not possible or appropriate we can provide *Made to Measure* lasts from 3D foot scans. We can make them using any of the standard open file formats, or from measures, foot prints and casts. Please use the *Made to Measure* last order form and attach the complementary data needed. *Made to Measure* lasts don't include the thickness of the foot orthotics in the last volume.

If you design your own 3D lasts we can mill it for you in our state of the art milling machine.

And, last but not least, to save you time, space and cost we now have a last hotel in our production facilities. If you store your lasts in our last hotel, we are ready to start with your order as soon as we receive it.

SYMBOLS

In order to simplify information, we use symbols for the most frequent product characteristics.

	Size range		Sole		Velcro strap with return
	Width		Heel height		Double velcro strap with return

Please refer to our website for updated information on news and stock.
