W-TEX: WATER REPELLENT MEMBRANE

Footwear with this symbol
is designed to include
waterproof membrane

+ W-TEX = HIGHER LEVELS OF
WATER RESISTANCE

Although it is always challenging to guarantee full waterproof levels when designing customised footwear, specific materials, construction features, and some production methods can enhance footwear's resistance to water.

Klaveness has an assortment of certified waterproof stock styles that constitutes the best basis for individually adjusted footwear if you need water resistance. These can include bellows tongue, coated split mudguards, hooks, and, if required, water repellent membrane (W-tex) for linings, preparing your footwear to face the harshness of Nordic winters.

Keep in mind!

When placing your order,
you must select
"W-tex (water repellent)"

UPPER COLOUR/MATERIALS

HOW DO WE REPRESENT THEM?

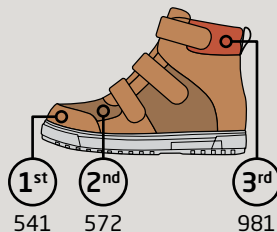

Each upper colour/material is represented by a three digit code (e.g. *Dune Nappa* is 541).

1 COLOUR

541
Dune Nappa

The codification order starts from the front of the shoe towards the heel.

If an upper has more than one code, we'll display a hyphen (-) between them (e.g. *Dune Nappa, Light Brown Nubuck, Orange Chevreau* is 541-572-981).

3 COLOURS

541-572-981
Dune Nappa, Light Brown Nubuck, Orange Chevreau

HOW CAN YOU CHOOSE THEM?

VERY EASY WAY

INDIVIDUAL FOOTWEAR

FOOTWEAR ADAPTATIONS

By using our Individual Footwear options, you can modify the footwear to meet your patient's requirements. We offer a full range of adaptations on all our footwear. A range of modifications to both last and styles can be done, and are categorised as below.

FIA FOOTWEAR WITH INDIVIDUAL ADJUSTMENTS

FIA footwear is made on a standard last and can have some modifications, including extra depth or width, but cannot effect the bottom shape of the last or require pattern/upper alteration.

The styles displayed in this catalogue can be modified in specific areas to achieve an optimal fit. They are available as "Recommended colour combinations" on the Online Configurator to help you through the process. Other upper material options are available online.

- Add adjustments: extra volume, heel stiffener, rocker sole, raise, wedge or flare.
- Change standard lining material.
- Choose the sole, i.e. standard PU, EVA or rubber soles; built EVA (with attached welt) or milled EVA (that allow external raise) soles.

OAS ORTHOPAEDIC ON ADJUSTED STANDARD LAST

Modifications to the last - including extra depth or width - that require an individual bottom shape, custom-made soles and pattern/upper adaptations, can be ordered as OAS.

- Select any style to match any last.
- Change uppers pattern: move instep up, move opening forward, etc.
- Add padding to vamps, quarters or full uppers.
- Standard opening or low opening can be requested.
- Raising or lowering of back height or top line.
- Opening or closing of lace gap.
- Shortening or lengthening of velcro straps.
- Moving tab position to assist foot entry.
- Re-positioning of seams to avoid problem areas of the foot.

OIL ORTHOPAEDIC ON INDIVIDUAL LAST

Some style ideas are suggested within this catalogue. However, we can make other styles to suit your patients' requests. Being the manufacturer, we can meet your requirements.

OIL includes extensive modifications to the last requiring individual bottom shape, bespoke soling and complete new patterns.

- Velcro, lace or zipper fasteners can be incorporated to the footwear.
- Shortening or lengthening of velcro straps.
- Make additions to prominent bones, etc.

KIDS COLLECTION

This catalogue displays the standard configuration (FIA) for each style

All colour/material options are presented in the Materials Guide section with detailed information

All styles in this catalogue are available as FIA, OAS and OIL

Upper and lining material samples are available on request

STANDARD SOLES

Standard Soles are pre-made soles that are compatible with Klaveness standard lasts. Each sole has different characteristics, such as heel height and material composition. Selecting a heel height close to your lasts' heel height will deliver the best results.

BUILT EVA SOLES

Built EVA Soles are highly versatile, as they fit most lasts, widths and sizes. We can produce them to any heel height or to meet any other specification you require.

We build up each midsole from an EVA block to the required height and configuration. A welt is attached, and a track is assembled as a separate part of the construction.
The standard EVA is Shore ≈50.

The heel height of Built and Milled EVA Soles is always defined by:

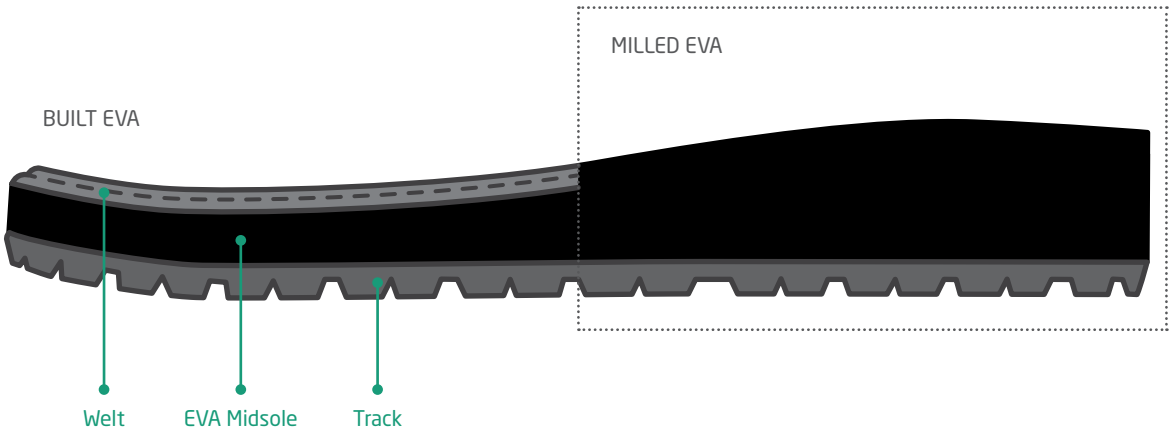

- The heel height of the last (or)
- The one specified in the order

MILLED EVA SOLES

Milled EVA Soles are highly versatile, as they fit most lasts, widths and sizes. We can produce them to any heel height or to meet any other specification you require.

The midsole unit is milled from an EVA block shaped according to your requirements. Milled soles are produced without layers of material and glue. They do not need a separate welt, as the wall in the milled EVA acts as a cup, concealing some of the footwear's visible height. Overall, it results in a lighter and more flexible sole.
The standard EVA is Shore ≈50.

- Conceals shoe volume by adding depth to the sole.
- No need for a separate welt - it is milled from the same EVA block as the midsole. Less glued layers result in a more flexible and appealing sole.
